Purpose of Inspection:

This was a routine inspection.

Inspection Summary:

The Operator is current on the permit fees and the Division and BLM hold a \$10,000 bond on the 3 acre site. Reclamation of the site will consist of removing the stockpiles and then vegetation.

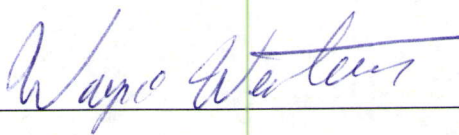

The site consists of stockpiles of uranium; there are no shafts, adits or highwalls so the public hazards are minimum. There are two uranium ore stockpiles on the west side of the Shootamaring Canyon road and one on the east side. Only the two on the west side are included in the Tickaboo Stockpile Removal NOI. The stockpile on the east side is still included in Ucolo's Ticaboo stockpile removal project S/017/0001.

Uranium prices are currently depressed so the prospect of activity on the site is unlikely until prices improve.

Conclusions and Recommendations:

The Division should continue to monitor the site.
